STATE INSPECTED: Grown from VIRUS FREE - DISEASE FREE STOCK

Dunlap: Old favorite of Mid- and Northwest. Glossy Red - sweet. Excellent for eating fresh, canning, freezing. Early.

Per 100 Prepaid	Per 1,000 F.O.B.
\$2.00	\$7.50

Robinson: Mid-season to late. Large bright red berries. Too soft for distant shipping but good for local market.

2.00	7.50
2.00	7.50

Florida "90": New berry for the deep South. Large, red clear through. Good shipper. Heavy producer.

2.00	7.50
2.00	8.50

Dixieland: New early variety. Ripens about with Blakemore. Berries average larger than Blakemore and higher yields per acre. Makes a good fruiting row. Good shipping and processing berry.

2.00	8.50
2.00	8.50

Armore: Late variety from Missouri. Has good flavor, large size, good shipper. Fruits over long period of time.

2.00	8.50
2.00	8.50

Catskill: Large berries holding size well till end of season. Fairly firm. Week or two later than Blakemore.

2.00	8.50
2.00	8.50

Premier: Early. Old favorite. Called "frost proof" because blooms are protected by leaves. Productive, good quality.

2.00	10.00
2.00	10.00

Albritton: New early variety. Large firm berries of high quality. Light red color.

2.00	12.00
2.00	12.00

Pocahontas: New variety, about a week later than Blakemore. Produced high yields. Good shipper and accepted by most processors. Bright, red, large berries, good flavor.

2.00	12.00
2.00	12.00

Klonmore: Early. Does best in Louisiana, Southern Coastal Plain to South Carolina. Medium size. Good shipper.

2.00	12.00
2.00	12.00

Empire: Appearance of plants excellent, healthy dark green foliage, and quite productive of medium sized plants. Good in the Premier section.

2.00	12.00
2.00	12.00

Sparkle: Rated high for freezing, slightly dark red, very glossy.

2.00	12.00
2.00	12.00

Belmar: Good early variety. Beautiful deep red berries of good flavor. Good for home use. Heavy producer.

VIRUS FREE—DISEASE FREE—GROWN IN ISOLATED FIELDS

Blakemore:

One of the very early varieties that can be depended upon to produce a good crop every year. Berries are light, bright red. Firmness of berries and the bright color of frozen and preserved products makes Blakemore a favorite commercial variety.

Florida "90":

New berry for the deep South. Large, red clear through. Good shipper. Heavy producer.

Robinson:

Mid-season to late. Large bright red berries. Too soft for distant shipping but good for local market.

Tennessee Beauty:

Productive mid-season variety with exceptionally good shipping and processing qualities. Berries are of large size and excellent flavor. Highly recommended for commercial and home planting.

Armore:

Late variety from Missouri. Has good flavor, large size and is a good shipper. Fruits over long period of time.

Klondike:

Early, large firm berries. Good shipper.

Missionary:

Early variety. Berries dark red and good flavor. Medium size fruit. Good shipper.

Pocahontas:

New variety, about a week later than Blakemore. Produces high yields. Good shipper and accepted by most processors. Bright red, large berries of good flavor.
